

Precision Irrigation for a Greener Tomorrow

ABOUT US

Complete Drip Irrigation Solutions, Engineered for Excellence

PRAGATI AGROTECH is a leading manufacturer of advanced drip irrigation systems, headquartered in Nashik, Maharashtra a city known as the agricultural heartland of India. With a strong commitment to innovation, quality, and sustainability, we provide reliable irrigation solutions designed to maximize crop yields, conserve water, and empower farmers globally. Founded with the vision to support modern farming practices, our product line includes **Flat Drip, Inline And Online Drip Systems, Mulching Films, Rain Pipes, Subline Pipe, ISI Filter , Battery Pumps Accessories, Drip Accessories and Other Essential Accessories** tailored to diverse agricultural needs.

We take pride in our state of the art manufacturing facility, stringent quality control, and a customer-first approach that ensures durable and efficient products at competitive prices. As we expand into international markets, our goal is to establish long-term partnerships by delivering consistent quality and customized solutions for every climate and crop.

OUR MISSION

To deliver innovative, high-quality, and sustainable irrigation solutions that empower farmers, conserve water, and increase agricultural productivity across India. We are committed to excellence in manufacturing and customer satisfaction through reliable products and advanced technology.

OUR VISION

To be a trusted leader in the irrigation industry by promoting smart farming practices, supporting rural growth, and shaping a future where every drop of water contributes to greener and more prosperous agriculture.

Empowering Agriculture Through Innovative Irrigation Solutions

COMPANY PROFILE

COMPANY NAME	PRAGATI AGROTECH
GST NO.	27AZNPG4785G1ZX
PAN NO.	AZNPG4785G1Z
FACTORY ADDRESS	Plot No. J-7/1 & J-6/3, MIDC Malegaon, Tal. Sinnar, Dist. Nashik, Maharashtra 422113
OFFICE ADDRESS	Shop No.3, Basement Floor, Dattaprasad Co-op. Soc, Dindori Naka, Panchavati, Nashik, Maharashtra 422003
FIRM TYPE	PROPRITERSHIP
DIRECTORS	Mr. DNYANESHWAR SHIVAJI GAVATE
IEC	AZNPG4785G

DIRECTORS PROFILE

"At Pragati Agrotech, We don't just Build Irrigation Systems We Build Trust, Value, and Sustainable Futures for Farmers Worldwide"

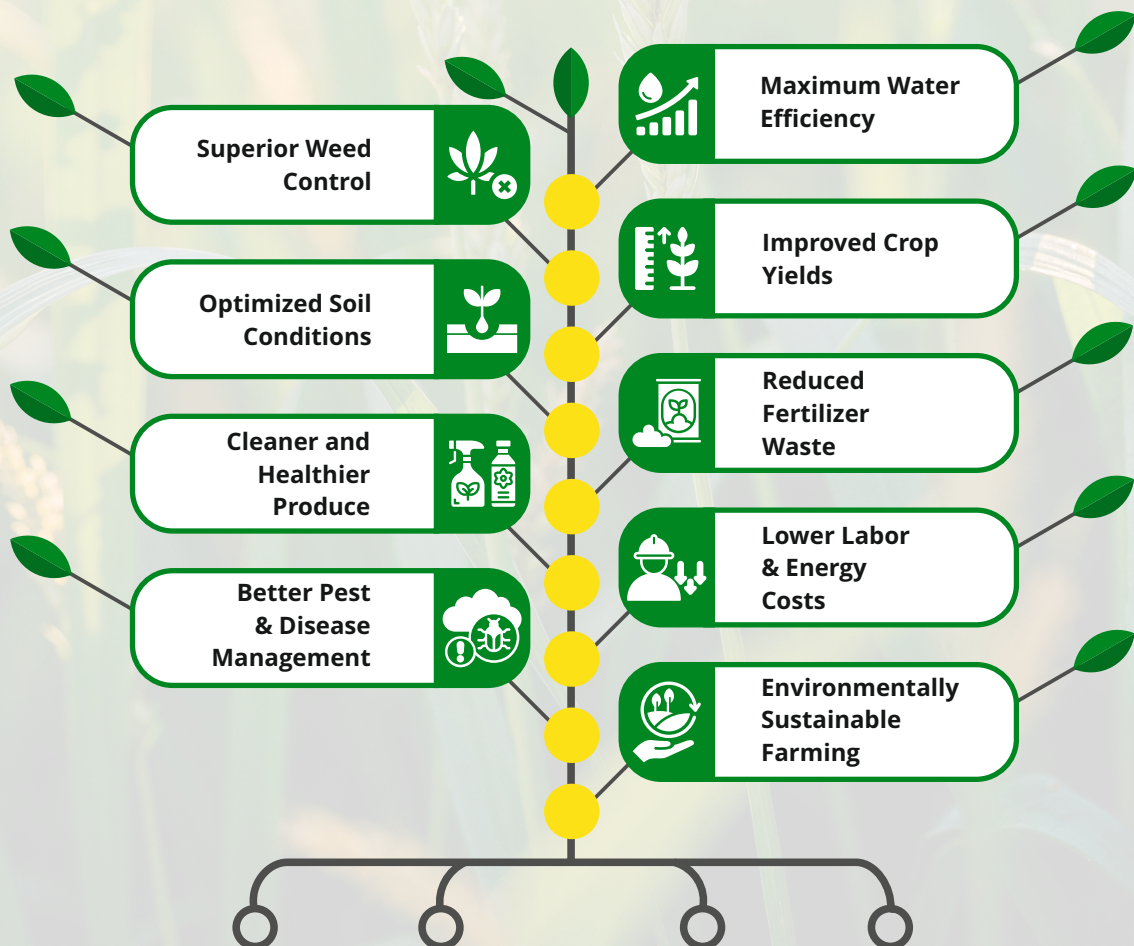

Mr. Dnyaneshwar Shivaji Gavate
Founder & Director, PRAGATI Group

Mr. Dnyaneshwar is the visionary force behind **Pragati Agrotech**, a leading manufacturer and exporter of drip irrigation systems based in Nashik, Maharashtra. With over **10 Years of experience** in the agriculture and irrigation industry, he has built a company that stands for innovation, quality, and farmer empowerment.

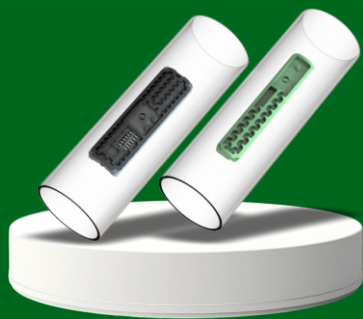

Under his leadership, Pragati Agrotech has expanded from a **local supplier to an international exporter**, delivering reliable irrigation solutions to farming communities across borders. His deep understanding of **agro-technology and sustainable farming practices** continues to drive the company's growth and global impact.

He strongly believes in **supporting farmers with affordable, high-quality irrigation systems** that improve yield and conserve water resources.

BENEFITS OF DRIP IRRIGATION & MULCHING FILM

FLAT DRIP

Flat drip irrigation Our offered Flat Drip Irrigation Pipe is widely used in agriculture sector for irrigation. Our offered pipe is the optimum grade tube that utilizes advanced technology for extended distance irrigation. Flat drippers are progressive irrigation pipes. They are more efficient and effective than round drip irrigation pipes. Generally flat droplets have less wall thickness, which is responsible for the ability to irrigate over long distances. Additionally, we have used optimum quality raw materials for its production and hence, the durability and unparalleled performance of Flat Drip Irrigation Pipe is ensured.

Uniform Water Distribution

Delivers precise and consistent water flow directly to plant roots, ensuring optimal crop growth and higher yields.

Clog-Resistant Design

Engineered with advanced labyrinth paths and high-quality emitters to reduce clogging and maintain smooth operation.

Durable & Flexible

Made from UV-stabilized, high-grade materials for long-lasting performance, even under tough field conditions.

Mulching Film

Our Mulching Film is a highly effective agricultural solution designed to enhance crop productivity and soil health. Made from high-quality, UV-stabilized polyethylene, it helps retain soil moisture, control weed growth, regulate temperature, and reduce evaporation making it ideal for a wide range of crops. Available in various thicknesses, colors, and sizes, this durable film improves root development, reduces chemical usage, and promotes cleaner, healthier produce. A must-have for modern farming, Pragati Mulching Film supports higher yields with lower resource input.

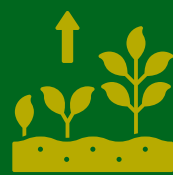

Moisture Retention & Weed Control

Reduces water evaporation and suppresses weed growth, ensuring healthier crop development with minimal maintenance.

UV-Stabilized & Durable

Made from high-quality polyethylene with UV protection, offering long-lasting performance under harsh farming conditions.

Enhanced Crop Yield & Soil Health

Promotes better root development, reduces chemical usage, and leads to cleaner, more productive harvests.

Online Drip

Our Online Drip Pipe is a reliable and efficient drip irrigation solution designed to deliver water directly to the root zone of each plant through externally attached drippers. Made from premium-quality, UV-stabilized polyethylene, it ensures durability, flexibility, and resistance to harsh weather conditions. The pipe is compatible with a wide range of online drippers, allowing farmers to customize flow rates based on crop needs. Ideal for orchards, vegetable farms, and nurseries, the Online Drip Pipe offers uniform water distribution, reduces wastage, and supports healthy plant growth with optimal water use efficiency.

Customizable Water Flow

Compatible with various online drippers to suit different crop needs, ensuring precise and efficient irrigation.

Durable & Weather-Resistant

Made from high-quality polyethylene with UV protection for long-lasting performance in tough outdoor conditions.

Efficient Water Use

Delivers water directly to the root zone, minimizing wastage and promoting healthier, faster-growing plants.

Inline Drip

Our Inline Drip Pipe is a high-efficiency irrigation solution featuring built-in drippers at fixed intervals, designed to provide uniform water distribution directly to the root zone of plants. Manufactured from premium-grade, UV-stabilized polyethylene, it ensures excellent durability, flexibility, and long service life. The pre-installed drippers reduce installation time and offer consistent water discharge, making it ideal for row crops, vegetables, and greenhouses. With options for various diameters, dripper spacing, and flow rates, the Inline Drip Pipe is engineered to conserve water, enhance crop yield, and simplify farm irrigation.

Built in Drippers for Uniform Flow

Ensures even water distribution across the field, promoting consistent crop growth.

Time-Saving & Easy to Install

Pre-installed drippers reduce setup time and simplify the irrigation process.

Durable & Weather-Resistant

Made from UV-stabilized, high-quality polyethylene for long-lasting performance in all farming conditions.

Rain Pipe

The Rain Pipe is an advanced irrigation solution designed for quick and uniform water distribution, ideal for crops that require overhead watering. Manufactured from UV-stabilized virgin polyethylene, it features laser-punched holes that simulate natural rainfall, promoting healthy plant growth while conserving water. Suitable for vegetables, pulses, and leafy greens, the rain pipe works efficiently under low water pressure and covers a wide area, reducing labor and energy costs. Easy to install and reusable, the Pragati Rain Pipe offers farmers a cost-effective, durable, and eco-friendly alternative to traditional sprinklers.

Rain-Like Watering with Laser Technology

Ensures even water distribution across the field, promoting consistent crop growth.

Efficient at Low Pressure

Pre-installed drippers reduce setup time and simplify the irrigation process.

Durable & Reusable

Made from UV-stabilized, high-quality polyethylene for long-lasting performance in all farming conditions.

ISI Screen Filter

Our ISI Screen Filter is a high-performance filtration system designed to protect drip and sprinkler irrigation setups from sand, silt, and other impurities. Certified by the ISI (Indian Standards Institute), it ensures dependable quality and filtration efficiency. Constructed with durable materials and fitted with a fine mesh screen, this filter is easy to install, clean, and maintain making it ideal for use in agriculture, horticulture, and landscaping. By preventing clogging and enhancing system longevity, the ISI Screen Filter supports smooth water flow and consistent field performance in all types of irrigation environments.

ISI Certified Quality

Backed by the Indian Standards Institute for reliable performance and assured filtration efficiency.

Effective Clog Prevention

Removes sand, silt, and impurities to protect irrigation systems and ensure uninterrupted water flow.

Easy Maintenance & Long Life

Durable construction with a user-friendly design for easy cleaning and long-term use in all farming conditions.

Subline Pipe

The Subline Pipe is an essential component in drip irrigation systems, used to efficiently distribute water from the mainline to lateral lines or emitters. Made from high-quality, UV-stabilized LDPE material, it offers excellent flexibility, strength, and resistance to harsh weather conditions. Its smooth inner surface ensures minimal friction loss, maintaining steady water pressure throughout the field. Easy to install and compatible with a variety of fittings and drippers, the Subline Pipe is ideal for row crops, orchards, and nurseries, providing reliable performance and long-lasting support for efficient irrigation.

High-Quality UV Stabilized Material

Made from durable LDPE with UV protection for long-lasting use in all weather conditions.

Efficient Water Flow

Smooth inner surface reduces friction, ensuring consistent pressure and uniform water distribution.

Flexible & Easy to Install

Compatible with various fittings and drippers, making installation quick and adaptable for different crop layouts.

Battery Pump

Our Battery Pump offers efficient, hands-free spraying for agriculture, cleaning, and sanitization. Powered by a rechargeable battery, it delivers consistent pressure and smooth operation without manual effort. Made from durable materials and equipped with adjustable nozzles, it ensures uniform coverage and reliable performance for both personal and commercial use.

Fine Mist Dispensing

Delivers a smooth and even spray for optimal coverage without clogging.

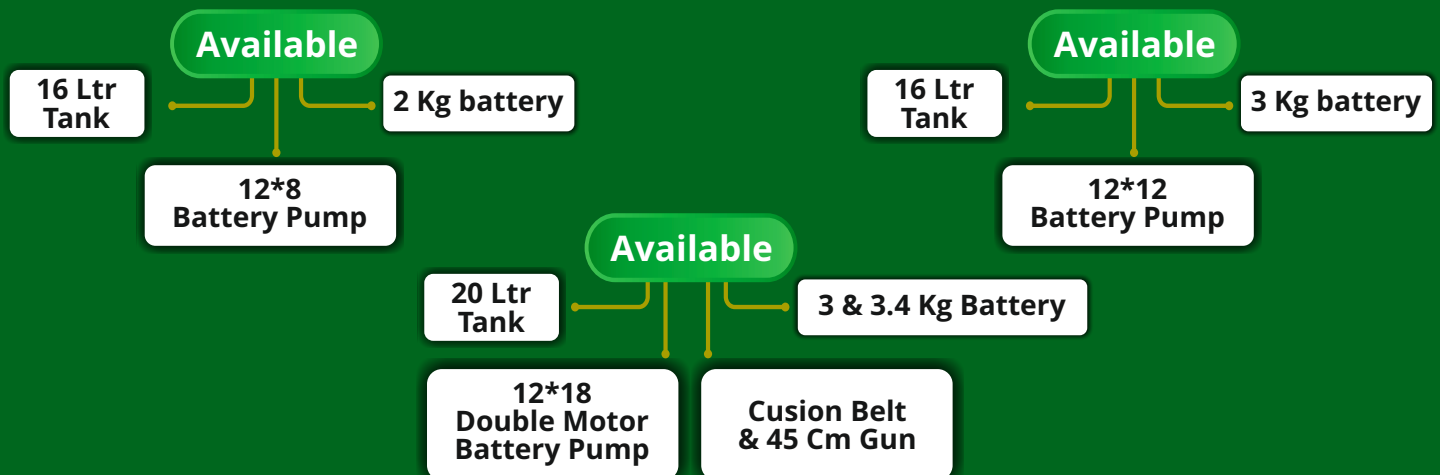

Durable & Leak Proof Design

Made from high-quality materials to ensure long lasting use and spill-free application.

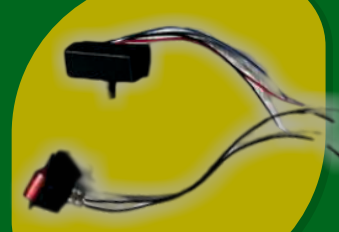

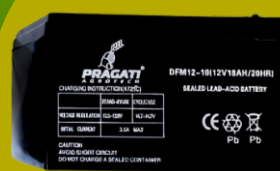

Versatile Compatibility

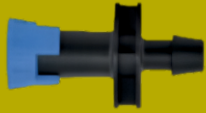

Fits a wide range of bottle types and is suitable for cosmetic, sanitizing, and household applications.
